N104	67	Identification Code Description: Code identifying a party or other code	C	AN	2/80	Used												

Syntax:

1. N102 R0203 -- At least one of N102 or N103 is required.
2. N103 P0304 -- If either N103 or N104 are present, then the others are required.

Comments:

1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

Four N1 loops are required for each PO: One each for N101 = "BT", "BY", "SE", and "ST". The "SF" loop is optional and may be sent to one or more roads. The "ST" loop can be used for either permanent or non-permanent shipping addresses. The use of various segments and elements for each of the loops can be found in Table I of the Appendix.

The Buyer expects the "BT" loop to be returned on any invoice exactly as transmitted on the Purchase Order. (See Guideline for 810 RIFMAT).
